

Manufacturing Growth Programme

Productivity Workshop: Lean Awareness

Overview

Lean Principles are essential in today's business world promoting standardisation procedures, which eliminate the waste of manufacturing resources, time, manpower, space and many other aspects within an organisation. It is a business strategy that involves everyone in an organisation making sustained continuous improvement "without large capital investments" focusing on *eliminating waste* in all systems and processes of an organisation. The improvement activities are undertaken to provide a better service and more value to the customer.

Aim of the Course

To provide all delegates with a good understanding of Lean Principles and how waste reduction will improve business performance and the customer experience. This event is suitable for all levels from shop floor to senior management.

Course Objectives

At the end of this workshop delegates will be able to:

- Explain the 5 Lean principles and the benefits of applying these to the business
- Understand the 7 production wastes and how to reduce them
- Run value added activities and waste management
- Explain and demonstrate the massive benefits gained by the implementation of Lean
